## 6 Move Method

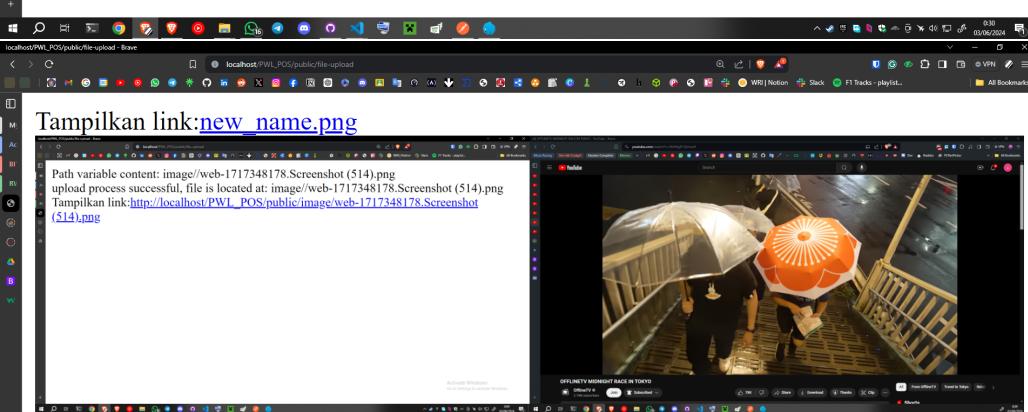

---

## 7 Assignment

1. -

The screenshot shows a "File Upload" form in a Brave browser window. It has two input fields: one for "Nama File" containing "new\_name" and another for "Gambar Profile" showing a file named "Screenshot (516).png". A blue "Upload" button is at the bottom.

The browser window now displays the uploaded file. The URL is "localhost:5000/PWL\_POS/public/file/upload". The page content includes the message "Tampilkan link:[new\\_name.png](#)", the path variable content "Path variable content: image/web-1717348178.Screenshot (514).png", and the upload process message "upload process successful, file is located at: image/web-1717348178.Screenshot (514).png". Below this, there is a thumbnail image of a person holding an orange and white umbrella on a wet street at night.

The browser window shows the same content as the previous screenshot, indicating the file is still being displayed.
